In truth, it's no longer a secret that you can repost one or more photos of other users on social media of the moment. The practice of reposting has already spread like wildfire among users, and is also one of the most used practices to increase followers on Instagram.Although, on the one hand, we have Facebook, which fills news feed with photos, videos and state updates from friends and pages we follow on the other is Instagram, which instead allows you to watch one post at a time. There is no sharing of your profile. You can like, comment, and post to one person, but you can't re-share it. Nothing surprising, Instagram logic is very different from Facebook. The same thing that has generated many limitations that the web version of social has. Originality, exclusivity and spontaneity are essential to Instagram, and Mark Zuckerberg's team will continue to work to make sure this is always the case, at least as long as possible. So you can't take another user's photo away? Yes and no. Officially it's not possible to do this, but there are several alternative ways to make a repost of a photo or video on Instagram. You can rely on some online tools or even special apps. In any case, attention should be paid to the fundamental aspect. Under the Instagram terms of use, before proceeding with the repost of any post, you will need to contact a concerned user and ask for permission to be able to post that particular content. For example, you can send a private message and make a simple request:Hi Dude, I wanted to congratulate you on the photo X. This is a really great shot. I wondered if I could make a repost in your profile, obviously quoting yours. As soon as you can, let me know. Thank you very much, Andrea The answer I received with these requests has been almost always Try it too. Help contentWest such a repost of Instagram English-language term Repost can be translated via our re-message. In the context of social networks, it means reissue of content that has already been published by another user. The script on Instagram is like this. The user posts a photo. I like it and I want to post the same photo in my profile. I'm going to make a repost. Advantages of repostPost images and videos on Instagram can lead to some results in terms of visibility and possible new followers. Andrea, but how? When someone reposts your shots and quotes you classic @ you generate a link that will lead directly to your profile. It is for this reason that many users intrigued by your photo can come to visit you and become your new followers. The best Instagram Repost AppsRepost for Instagram (iOS - Android)We face one of the best apps ever for a repost on Instagram. The operation is very simple, but even if you have difficulties, you can consult the guide (step by step) in the app. The process of creating a repost with this app is as follows:Open InstagramOn the photo, which you want to repostClick on the top 3 points in the top rightClick copy URL to shareOpen Repost for InstagramSee that you will see the photo appear copied earlierClick on it and you will enter edit modeIn this point click on Repost and then on Copy to Instagram:It will open Instagram again and you will have to go to all stages of the post just as if it were new. That's it. InstaRepost [iOS - Android]Another app that is widely used for reposts on Instagram is just that. The GUI is simpler and less functional than the one we've seen before, but it's perfect for those who don't have many needs. Alternative method

without application If you do not want to download any third-party applications, you can use Downloadgram. It's a free online tool that can upload photos and videos from Instagram.Andrea, but how does it work? Again, we face a quick and easy solution. In fact, just follow these steps:Open InstagramAve to the photo/video you want to uploadClick at 3 points in the top right Click on Copy URL to share The Way to downloadGramGlue URL site you just copied from InstagramClick to upload and then to Upload image Once you upload the photo you can go back to Instagram and post a photo. That's it. Home Social Repost for Instagram 3.4.2 Categories:Apps,Social Developer: Red Cactus Version: 3.4.2 Reviews: Here's another great APP repost for Instagram 3.4.2 for 4.4 and up.
